

Your story. Thoughtfully edited.

I help people and organizations turn raw footage and real moments into meaningful visual stories.

01 Video editing

For interviews, event films, podcasts, and longer stories.

Story structure, pacing, b-roll, sound cleanup, music, color, and supporting graphics, scoped to your project.

02 Content repurposing

Give an existing conversation a focused new format.

Selected short-form cuts, reframing for vertical or square, captions, and platform-specific versions.

03 Story-led video production

Plan and capture the people and moments behind the message.

Interviews, profiles, and event coverage, with production needs and editing agreed before filming.

04 Photography

Thoughtful coverage of people, details, and moments.

Event, individual, and sports photography, with the shot list and final image delivery tailored to your needs.
